Wilderness Residential

Wilderness Residential

Children, young people and their families have the amazing opportunity to fully immerse themselves in the natural environment, giving them opportunities to grow personally and socially through the delivery of a broad range of meaningful and inspiring activities. We believe residential provide a completely different dynamic to any other type of intervention and can be a genuinely life changing experience.

All our programmes support children and young people to access the great outdoors and develop an emotional connection with the natural environment. All activities are highly accessible and can be continued by participants independently for minimal cost in their local community, following the course.

Activities Include:

- Fishing
- Hiking
- Orienteering
- Camp Craft/Camp Fire Building
- Navigation/Map Reading

Participants also:

- Have the opportunity to learn about the water cycle, ecosystems, weather patterns, environmental protection, wildlife identification and much more.
- Benefit from daily access to beautiful fisheries, woodlands and some of West Sussex most beautiful countryside.
- Have opportunities to develop leadership skills and lead activities with younger children.

Outcomes are achieved by

- Providing a dynamic and personalised mix of one to one, group work, role play, family support and outdoor activities
- Supporting participants to change the way they feel about themselves and their lives.

Overview

A4E are pleased to offer our wilderness residential experiences tailored to meet specific needs of the commissioning agency. A4E have provided SEND specialised residentials with the focus on fostering independence and encouraging safe risk taking. We have delivered projects for young people at risk of becoming NEET by supporting post 16 progression. We have also delivered residentials for whole families to encourage team building and encourage families to experiment with different ways of working together.

A4E has a proven track record of engaging and achieving positive outcomes for the most disenfranchised and challenging children, young people and their families. A dynamic and personalised mix of 1 to 1, group work, role play, and outdoor activities are used to support children, young people and families in developing a variety of emotional, social and practical skills.

Accreditation/Qualifications

Courses can be accredited by the Angling Trust or by school/organisation preferred accreditation schemes such as ASDAN, AQA or similar.

Outputs

A general assessment of individuals' targeted needs is carried out at the beginning and end of each residential course.

A4E's assessment and monitoring process is used to identify daily and full programme development goals for each participant. In addition, learners reflect on daily development goals and achieve a progress score each day, enabling outcomes to be reliably reported and evaluated.

Outcomes

"We took 12 pupils with Special Educational Needs on a residential trip with Angling4Education and I can honestly say it was the best group experience those pupils had ever had. They were able to learn new skills, communicate well with one another, work towards a goal and show independent living skills that impressed their parents. I would thoroughly recommend the experience to stretch pupils, show them a glimpse of their potential and encourage communication skills they will need for life".
